## REQUIRED PARENT SUPPORT POLICY

This Parent Support Commitment and Agreement is required to register your swimmer(s) in the Los Paseos Aquatic Club (LPAC). Parent support is required in order to run the swim meets in a timely and efficient manner. The LPAC by-laws Article II, Section 5.b.2 states that members of LPAC have the following responsibilities: to cooperate in support of all club activities, and to attend and assist at swim meets.

Each swimmer must have a parent (guardian) sign and commit to comply with this policy. Family support can be contributed by a parent, grandparent, or any adult family representative. Each LPAC family with one swimmer must provide at least one adult volunteer to work at least one shift at each meet (home or away) when their child is swimming. Each family with three or more swimmers must provide at least two volunteer shifts at each meet. Occasionally families will need to volunteer for additional shifts at meets.

Please visit the Volunteering page under the Team Info tab on the website ([www.swimlpac.org](http://www.swimlpac.org)) for further information on the positions available, after May 24th. Families who have a hardship working the meet(s) need to contact the LPAC Volunteer Coordinator to arrange an alternate support schedule and or activities.

***In addition*** to working volunteer shifts, each LPAC family will be responsible to clean up at one of our home meets. You can sign up at the beginning of the year on a first-come, first-served basis, but you will be assigned a date even if you don't sign up.

***Per our bylaws***, families who do not fulfill their parent support obligations will not be in good standing with the club, and their swimmers will not be allowed to return to the team the following year. In addition, a monetary fee may be assessed to compensate for the lack of participation.

As the parent or guardian of \_\_\_\_\_, I have read the above required parent support policy for the LPAC swim team and understand that if my family does not fulfill the required support this year, my child(ren) will NOT be allowed to participate in CHAMPS and will not be allowed to return to the team the following year. I also understand that my family may be charged an additional fee for lack of participation.

# LPAC Concussion Protocols 2023

The Los Paseos Aquatic Club swim team requires that any swimmer that incurs a serious head injury or concussion be cleared by a licensed healthcare professional before participating in any swim practice or meet.

In the event of an injury, even if it occurs outside of an LPAC event, parents are required to promptly notify the head coach or a member of the Board of Directors that an injury has occurred to their swimmer. In the event a concussion is diagnosed by a licensed healthcare professional, and in compliance with state law, a mandatory graduated return to activity over 7 days will also be required.

LPAC coaches take the online concussion training class at <https://www.cdc.gov/headsup/index.html>. Parents and swimmers are also encouraged to take this free online program to learn more about treating and preventing concussions.

**What is a concussion?** A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious.

**What are the signs and symptoms of concussion?** Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury. If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

### Symptoms reported by athlete:

<b>Headache or ‘pressure’ in head</b>	<b>Sensitivity to light</b>	<b>Confusion</b>
<b>Nausea or vomiting</b>	<b>Sensitivity to noise</b>	<b>Just not ‘feeling right’ or is ‘feeling down’</b>
<b>Balance problems or dizziness</b>	<b>Feeling sluggish, hazy, foggy or groggy</b>	
<b>Double or blurry vision</b>	<b>Concentration or memory problems</b>	

### Signs observed by coaching staff:

<b>Appears dazed or stunned Forgets an instruction</b>	<b>Unsure of game, score, or opponent</b>	<b>Can’t recall events prior to hit or fall</b>
<b>Confused about assignment or position</b>	<b>Shows mood, behavior, or personality changes</b>	<b>Can’t recall events after hit or fall</b>
<b>Moves clumsily</b>	<b>Loses consciousness even briefly</b>	<b>Answers questions slowly</b>

**Concussion Danger Signs:** In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

<b>One pupil larger than the other</b>	<b>Becomes increasingly confused, restless, or agitated</b>	<b>Repeated vomiting or nausea</b>
<b>Is drowsy or cannot be awakened</b>	<b>Slurred speech</b>	<b>Has unusual behavior</b>
<b>A headache that gets worse</b>	<b>Convulsions or seizures</b>	<b>Loses consciousness (even a brief loss of consciousness should be taken seriously)</b>
<b>Weakness, numbness, or decreased coordination</b>	<b>Cannot recognize people or places</b>	

**What should you do if you think your athlete has a concussion?** (1) If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a healthcare professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play. (2) Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional. (3) Remember: concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

**Why should athletes report their symptoms?** If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.

**Did you know?** Most concussions occur without loss of consciousness. Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion. Young children and teens are more likely to get a concussion and take longer to recover than adults.

Please sign to acknowledge both parent and swimmer have read this information and understand the LPAC Concussion Protocols.
